solo-step™

ABOUT US

The story of Solo-Step has always been about family. What started as a fun afternoon on the lake, ended with a trip to the emergency room and a severely injured leg. Although doctors did what they could, the boy lost his leg. Watching his young son try out his new prosthesis, the father envisioned a system that would restore his child's confidence and protect him from falling during the rehabilitation process.

In 2001, Solo-Step was born. It has since been adopted in physical therapy facilities, hospitals, skilled nursing facilities, universities and homes across the country. Over 20 years later, Solo-Step continues to keep family values at the heart of everything they do. Solo-Step prides itself on providing excellent customer service and support for both therapists and their patients.

We are a patented overhead track and harness system that allows therapists to work with their patients one on one. Patients are secured in the harness, which is then connected to a lanyard and trolley, allowing the patient free range of motion during therapy. The system allows patients to focus their attention on recovery instead of worrying about falling. This gives patients the confidence necessary to push themselves through physical therapy to achieve the highest possible outcomes.

solo-step[™]

THERAPIST BENEFITS

- Allows caregivers to fully concentrate on the patient rather than anticipating falls.
- Ability to step away and view total body alignment during gait therapy.
- Decreases the number of caregivers needed to ambulate patients.
- Minimizes risk of injury to caregivers, potentially extending career longevity.

THERAPIST TESTIMONIALS

JUSTIN KUNTZE LPO/CPO

I have used Solo-Step for years to treat a variety of my patients and have had great success! They are easy to use and are durable. I highly recommend trying.

SHONDELL JONES DPT

Great product. It fits well in our clinic. Good cost and good value. I would recommend to anyone interested in taking their gait and balance programs to a higher level.

PATIENT BENEFITS

The Solo-Step Fall Protection System can be utilized in virtually all aspects of rehabilitation, providing the patient a sense of security which allows them to focus on recovery instead of the fear of falling.

- Promotes confidence
- Eliminates the fear of falling
- Ability to regain strength and stability faster
- Promotes safe rehabilitation environment
- Enables patients to challenge themselves to advanced therapies

PATIENT TESTIMONIALS

VANNESSA ROSS

This piece of equipment is amazing. I have tried a lot of different devices in my journey to walking again. But the Solo-Step is unique because it allows me the ability to focus on walking while not having the fear of falling.

ALICE RIES

Solo-Step gives me confidence because I know I won't fall, so I can do my exercises without worrying.

JEFFREY SCOTT

Solo-Step has allowed me to kick up my training without the fear of falling. Thank you all!

JOSHUA EKHALL

The Solo-Step for me, unloads me enough to give me the confidence to try to run again. And to know that if I fall, I'm not gonna fall on my face. It'll catch me. It's not only physically beneficial, but psychologically beneficial to know that there's still room to improve and that there's something that's going to help me get there.

SYSTEM CAN SUPPORT PATIENTS UP TO 420 LBS.

TWO HARNESS OPTIONS

Three quick connect buckles

Five points of adjustment for comfort and security

Can be placed on patient in standing or seated position

Back of the harness is made of a cell foam with mesh lining

Helps wick moisture away from the body

Two-year warranty

HIGHLY RECOMMENDED

WILLIAM HOLMAN

This system is everything it is advertised to be. The system is quiet and stable, which is great when you use it all day, every day. The patients love the feeling of security instead of a therapist cinching a belt around their waist. In addition, the representatives are super easy to work with and accommodating. As far as installation, it is absolutely worth paying for. The guys are quick and clean up afterwards.

JOSHUA DAVIS

Solo-Step has given our patients the confidence they need during their balance and gait training. Great equipment and very easy company to work with.

JON LOWRY

Since having Solo-Step installed, we have utilized the product from day one. Not only has it helped with day to day operations, but also with our clinical research programs. Solo-Step has been nothing but a pleasure to work with, from quote to installation. The Solo-Step team and installers are second to none! I highly recommend Solo-Step!

AYOMIDE FASALOJO

We are loving the Solo-Step system. I've put just about every patient in it and they love it as well. They feel safe in it and I really enjoy how simple it is to get the patients in and out.
